HS2 Euston Enabling Works	Mace Dragados (MDJV)	09/2019 – 10/2021	Rail - Construction

## Position:

Lean Improvement Specialist – Enabling Works

**Scope:** Reporting directly to the MDJV Alliance project Director. Focusing on improvement development within the £2bn+ Euston Station, Enabling Works. Prioritised alignment of Hs2 teams, collaborative engagement, interface, & assurance remain areas of key focus. Developing progress from concept - design, - procurement – construction. Key challenges are based on getting the best for business solutions, across the full contract, including key stakeholders.

## Outline Of Achievements:

- Working with the wider design / delivery teams including CSJV – HS2 – MDJV – Mott Mc developing Interface / collaborative Work Group Control Room Sessions.
- Cleared backlog of 138 key client to JV instructions, which in turn were delaying key works.
- Developed escalation (Contractor – Client) process to ensure achievement of prioritised outcomes
- Delivered remote working dashboards (COVID19), to enable work package delivery, supporting Demolition
- Delivered improvement workshops, focusing on collaborative, performance & leadership development
- Resolve dispute / miss alignment through rigorous control sessions, working closely with all stakeholders
- Refined & accelerated Sub Contract Works information Packs, 18 months of delay cleared, & approved within 6 weeks
- Ran daily Control room Sessions to ensure Design transfer was achieved, negative critical path impact avoided
- Developed a process to ensure all of the HS2 Euston project had full visibility of performance, challenges, areas of specific escalation support. This project was commissioned, & led by the overall HS2 project lead (Laurence Whitbourne), involving all other sub contract delivery elements.
